

ART TV

TECHNICAL CHANGES: TRANSPONDER SWITCH

Due to Eutelsats reconfiguration of transponders on satellite Eurobird 9A, some technical adjustments on Art TV satellite parameters will occur soon. Instead of transponder 65, the signal of Art TV will be relocated on transponder 51 on the same satellite. All other technical details will remain the same. When this change occurs the operators will have only to reset their receivers to this new frequency:

Satellite: EUROBIRD 9A, 9°E

Transponder: 51

Frequency: 11 747 MHz

SR: 27.500

FEC: 3/4

Polarisation: horizontal

Encryption: Conax

Please note that this change will happen in coming days.
